In the late medieval and early modern periods, Scottish latinity had its distinctive stamp, most intriguingly so in its effects upon the literary vernacular and on themes of national identity. This volume shows how, when viewed through the prism of latinity, Scottish textuality was distinctive and fecund. The flowering of Scottish writing owed itself to a subtle combination of literary praxis, the ideal of eloquentia, and ideological deftness, which enabled writers to service a burgeoning national literary tradition.

This essential introduction to American studies examines the core foundational myths upon which the nation is based and which still determine discussions of US-American identities today. These myths include the myth of »discovery,« the Pocahontas myth, the myth of the Promised Land, the myth of the Founding Fathers, the melting pot myth, the myth of the West, and the myth of the self-made man. The chapters provide extended analyses of each of these myths, using examples from popular culture, literature, memorial culture, school books, and everyday life. Including visual material as well as study questions, this book will be of interest to any student of American studies and will foster an understanding of the United States of America as an imagined community by analyzing the foundational role of myths in the process of nation building.

The subject of the posthuman, of what it means to be or to cease to be human, is emerging as a shared point of debate at large in the natural and social sciences and the humanities. This volume asks what classical learning can bring to the table of posthuman studies, assembling chapters that explore how exactly the human self of Greek and Latin literature understands its own relation to animals, monsters, objects, cyborgs and robotic devices. With its widely diverse habitat of heterogeneous bodies, minds, and selves, classical literature again and again blurs the boundaries between the human and the non-human; not to equate and confound the human with its other, but playfully to highlight difference and hybridity, as an invitation to appraise the animal, monstrous or mechanical/machinic parts lodged within humans. This comprehensive collection unites contributors from across the globe, each delving into a different classical text or narrative and its configuration of human subjectivity-how human selves relate to other entities around them. For students and scholars of classical literature and the posthuman, this book is a first point of reference.
